## (54) Title: DEVICE AND METHOD FOR INTERNET LOTTERY-AUCTION

(57) Abstract: The present invention relates to an internet lottery-auction apparatus and method of subsidized auction types, more particularly to an internet lottery-auction apparatus and method for raising probability of making a successful bid by designing different methods for determining the highest bid price according to the auction types and providing new reliable lottery methods. For this purpose, the present invention provides a new internet lottery-auction method of auction types, which subdivides the auction types into a general type lottery-auction method, an upper limit price type lottery-auction method and a small profits and quick returns type lottery-auction method and a simultaneous bidding type lottery-auction method and uses different types of methods for determining the highest bid price according to those types of the lottery-auction methods, and also provides transparent lottery methods using bidding prices, bidding times and so on.
